

The Villages Archery Club

Fun Shoot

The third annual Fun Shoot will be next Saturday, April 6 at the Paradise Range and we need a final count to order the food. If you intend on shooting, please let us know

[HERE](#)

Thanks

The April meeting will be held on April 8 at Laurel Manor Rec Center at 6pm

As mentioned at last month's meeting, we plan on hosting a arrow repair and building clinic at our April Meeting. Our President Vice President and Treasurer are out of town, so following our hopefully brief business meeting, and in place of a "Tech Talk" we will have a long awaited arrow clinic. Jim Murray and Charlie Wilson will bring the club fletching jigs, arrow saw and other related equipment including our supply of vanes, nocks and points with the goal of teaching our members how to build and repair arrows. If you have arrows that need fletching replaced, points replaced or new nocks bring them along this is your chance to get them fixed and learn how to maintain them in the process. If you are thinking about new arrows you should have time to get them ordered prior to the meeting. If you do not know what to order, we will have Lancaster catalogues on hand and can help you select arrows that will fit your bow. Note that in order to select arrows we need to know how long your arrows need to be (we can measure this at the range if you see one of us while we are there) and what the draw weight is of your bow. We have a scale for this in our shop at the Paradise range.

Additionally, if anyone has a fletching jig, arrow saw or spine tester signed out please return it no later than Sunday, April 7 so we will have all of them for the clinic. They will be back in the shop on Tuesday April 9 so they can once again be signed out

ALSO,

If any other experienced members would be willing to help out in what we hope will be a busy clinic, we would appreciate the assistance!

Summer League

If you are interested in the summer 20 yard handicap league, please let us know [HERE](#)
We need to know soon who is interested so plans can be made to facilitate the starting date.
