

The Villages Archery Club
Meeting Agenda
September 8, 2014

Welcome:

Welcome new members.

Financial Report:

Balance Sep 8: \$3824.91

Current Membership:

As of Aug 11: 230

Old Business:

Anyone wanting a club ball cap can come up at the end of the meeting and get one. We still have a few left.

We have yet to reach any solution with the roof drip problem. Nothing has been done yet. Charlie will contact Dillon.

A small fridge has been installed in the equipment room. There is a container inside for donations for soda, etc. Please do not leave food over night. If you bring it in, please take it out.

Last month there was a discussion regarding the possible installation of some kind of air circulating fans beneath the shelter. Dillon will be consulted regarding this. Nothing done yet. Charlie will contact Dillon

Bill Southwick has agreed to take over the library.

Ken Woolley has agreed to act as the club's purchasing agent with Lancaster Archery Supply. We will inquire with Lancaster about any possible club discounts that might be available.

NovemberCarl Frank
DecemberBob Sirek

New Business:

Some of you have seen the notice from The Villages Recreation Dept that says that range use on Mon through Fri from 1 to 3 is exclusively for the use of Recreation programs. As residents, we all have the opportunity to participate in

these programs. A lengthy discussion followed this announcement. The majority of speakers were not objecting to this.

The equipment room is looking good. New bow racks have been mounted. A new storage system is mounted on the wall for hanging tools. There is a piece of PCV tube on the left hand side of the bench for putting arrows in that need repair. Work will continue to make this room more organized. Please help keep the room looking neat and clean.

We will be hosting the first tournament of the fall season on Sunday, Sep 28. There will be a work party on Thursday Sep 25 to prepare the range. Please take note of any targets that need repair and let us know. A reminder for the work party will be sent out via eMail.

Bill Southwick will run the line. John Thomas, Phil Hurlbut and Tom Davis will handle registration.

The plastic target faces that were installed for the June 15 tournament are still being used after nearly three months. They are badly shot up, but still very serviceable with the patches. They have proved to be cost effective and we have ordered a large quantity from Tim Austin (Tim is the NFAA Southeast Region Councilman and FAA Secretary/Treasurer) at a cost of about \$4.20 each which is a substantial savings over other suppliers (\$8.00). We have also ordered 250 double sided indoor faces at \$.25 ea. One drawback of using the weatherproof 122cm faces is that the faces are not getting moved on the butts and the center of the butts are getting shot out. Please rotate the faces on the butt so as to equalize the wear. We will have enough 122cm faces to last several years.

Any other new business?
